

Petit Ballet Academy, LLC

Due to the COVID-19 pandemic, we have had to adjust the way we do things in our studio. The following are guidelines from the CDC and the state of Utah and we as a studio want to keep our staff and students as safe as possible. As we receive updates on the pandemic guidelines, we will keep you informed. These restrictions will be lifted as soon as the State of Utah permits.

The rules for participation beginning September 8, 2020:

1. Absolutely NO sick symptoms of anyone in your household for the last 48 hours – no coughing, fever, runny nose, sore throat, etc. Please take your dancer's temperature before leaving home and do not send them to class if it is abnormal.
2. As directed by our governor, dancers & teachers are encouraged (but not required) to wear a medical grade mask.
3. The studio and bathrooms will be sanitized before each class.
4. To prevent the spread of germs, please don't send your dancer with any extra items into class. They are welcome to bring a water bottle, mask and their dance shoes. Please leave bags and other unneeded items at home.
5. Dancers are encouraged to bring personal water bottles labeled with their names. Drinking fountain will be shut off.
6. Please talk (in depth) with your dancers about not touching other dancers or the teacher. This will be difficult for everyone since we will all be excited to see each other after isolation. Regardless, this is imperative. (*See note below.)
7. Only one parent or guardian is allowed to wait in the waiting room during class time. Please leave other children at home.
8. Please bring your dancers into the studio exactly on time – not before their class start time. This will help us keep the numbers in the studio to a minimum.
9. Classes will be dismissed exactly on time – please be there for your students to leave right away so we keep our numbers down inside the studio and the teachers can sanitize everything.
10. Dancers will be asked to sanitize their hands upon entering the studio.
11. Markers will be spaced 6 feet apart to remind children to remain 6 feet apart from other dancers. I know this seems impossible but with everyone's cooperation - we can do it! (*See note below.)
12. Curricular adjustments have been made to minimize prop use to reduce mixing and mingling in the classroom.

*NOTE: Our teachers will do all they can to help everyone succeed at these inconvenient guidelines. While it will be difficult to maintain these standards, and these standards may be inadvertently broken throughout the class, we will do our best to help everyone stay safe.

I have read and understand the above rules and these rules have been explained and accepted by my dancer(s). I understand that consistent disregard for these rules could result in not being able to continue in-person classes (this would come after warnings and discussions between Marybeth and the parents/guardians).
